

Supply List for the Dawn Edwards “Felt Bird Pods” Workshop

Come and enjoy a fun day of wet-felting as you create a felt bird pod which is sure to be a hit with your feathered friends. The bird pod will be made of naturally water repellant Bergschaf wool. Small birds such as Wrens, Nuthatches, and Chickadees will use them for shelter and/or nesting. This is a great introduction to 3D felting, employing the same techniques used in making hats, bags, slippers, etc. Watch as our flat felt pieces become three-dimensional.

Materials fee: \$35/person. Included in this fee: Wool batts for bird pod base, colorful Merino wool tops for surface decoration, embellishing fibers, written instructions, and plastic resist/pattern material.

If you have materials available, or would prefer to source your own materials, please contact Dawn (dawn@feltsoright.com) and she will send a more detailed supply list giving weights and sizes of the items mentioned above. dawn@feltsoright.com

Students Materials List:

- 2-3 bath size towels.
- A plastic bucket for water (a beach pail is ideal).
- A laundry sprinkler or Ballbrause sprinkler if you have one (*I will have several to share if not*).
- Bubble wrap: 2 ft. wide x 6 ft. length (*If you have trouble finding 2' wide bubble wrap, just duct tape narrower widths together. Tape on the smooth side*).
- Sharp pointy scissors.
- A wooden spoon for shaping the bird pod.
- Pool noodle for rolling your felt. You will only need half the length of the pool noodle, so you and a friend may wish to snip the pool noodle in two.
